

Partnership Opportunity DA40 Diamond Star

Morristown, NJ

One of our clients has asked us to arrange a fifty percent partnership in a DA40 Diamond Star. This is your opportunity to become an airplane owner with less cost and less hassle.

The Diamond Star is a four place 150 knot aircraft with a terrific safety record. We recently bought for the school a 2004 model with G1000 glass panel and autopilot for \$180,000. We are extraordinarily happy with it. It has been very reliable. It is a stellar instrument platform.

The offer we are making is unique. For a fifty percent share in the capital and fixed expenses, you will get the benefits of a solely owned aircraft. If there is a scheduling conflict, Best in Flight will make another DA40 available to you. This way you always have a DA40 for the weekend, but at half of the annual cost.

You and your partner will be the only pilots of the aircraft. The aircraft will be insured for personal and business use. It will require scheduled maintenance only once each year. It will NOT be a school airplane.. You may earn your instrument rating in the Diamond Star or use it for vacations, whenever you want.

Morristown Airport is conveniently located 30 minutes west of the Holland Tunnel. Morristown offers four runways, the largest of which is 5999' x 150'. It has multiple instrument approaches and aircraft rescue service.
