

Instrument Pilot Ground School

BEST IN FLIGHT

Autumn Session - Nov - Dec 2012

Tuesday Evenings 7:00 p.m. to 10:00 p.m.

Linden Airport, Hangar 400

The Best in Flight Instrument Pilot Ground School is an intensive eight-week course that provides the solid foundation you need for developing aeronautical judgement, to plan and fly safely in the weather, to communicate effectively with ATC, to understand your aircraft's capabilities and limitations and to anticipate its behavior under any and all flight conditions – so you can safely get the most possible enjoyment out of your flying experience.

Weekly classroom sessions are supplemented with reading assignments, flight planning exercises, together with hands-on experience planning an actual flight. This is not simply a written test prep class; it is a complete ground school.

Graduates of Best in Flight ground schools are invited to attend as a refresher, free of charge.

Class Date	Subject Matter
-------------------	-----------------------

06 November	Introduction and Definitions; Basic Attitude Flying
13 November	Federal Aviation Regulations, Radio Communications
20 November	Navigation, Low Altitude Chart, AFD, TERPS
27 November	Flight Planning; Alternates
04 December	Aviation Weather for Instrument Pilots
11 December	VOR Approaches; ILS Approaches
18 December	RNAV Approaches; PAR Approaches; DME Arcs
26 December Wed	Emergency Procedures; Course Review

Instrument Pilot Ground School

BEST IN FLIGHT

Autumn Session - Nov - Dec 2012

Tuesday Evenings 7:00 p.m. to 10:00 p.m.
