

Instrument Pilot Ground School

BEST IN FLIGHT

Winter Session - March - April 2013

Tuesday Evenings 7:00 p.m. to 10:00 p.m.

Linden Airport, Hangar 400

The Best in Flight Instrument Pilot Ground School is an intensive eight-week course that provides the solid foundation you need for developing aeronautical judgement, to plan and fly safely in the weather, to communicate effectively with ATC, to understand your aircraft's capabilities and limitations and to anticipate its behavior under any and all flight conditions – so you can safely get the most possible enjoyment out of your flying experience.

Weekly classroom sessions are supplemented with reading assignments, flight planning exercises, together with hands-on experience planning an actual flight. This is not simply a written test prep class; it is a complete ground school.

Graduates of Best in Flight ground schools are invited to attend as a refresher, free of charge.

Class Date	Subject Matter
-------------------	-----------------------

05 March	Introduction and Definitions; Basic Attitude Flying
12 March	Federal Aviation Regulations, Radio Communications
19 March	Navigation, Low Altitude Chart, AFD, TERPS
26 March	Flight Planning; Alternates
02 April	Aviation Weather for Instrument Pilots
09 April	VOR Approaches; ILS Approaches
16 April	RNAV Approaches; PAR Approaches; DME Arcs
23 April	Emergency Procedures; Course Review

Instrument Pilot Ground School

BEST IN FLIGHT

Winter Session - March - April 2013

Tuesday Evenings 7:00 p.m. to 10:00 p.m.

Linden Airport, Hangar 400
