

Private Pilot Ground School

BEST IN **FLIGHT**

Spring Session — April, May 2009

Sunday afternoons 12:30 p.m. to 4:30 p.m.

9 Airport Road, Morristown

The Best in Flight Private Pilot Ground School is an intensive 8-week course that provides the solid foundation you need for developing aeronautical judgement, to plan and fly safely, to communicate effectively, to understand your aircraft's capabilities and limitations and to anticipate its behavior under any and all flight conditions – so you can safely get the most possible enjoyment out of your flying experience.

Weekly classroom sessions are supplemented with reading assignments, flight planning exercises, and selected on-line mini-courses, together with hands-on experience planning a actual flight. This is not simply a written test prep class; it is a complete ground school.

Class Date

Subject Matter

5 April	Introduction and Definitions Basic Aerodynamics
12 April	Federal Aviation Regulations
19 April	Navigation
26 April	Aviation Weather
3 May	Radio Communication Procedures Aerodynamics Revisited - Weight and Balance Principles of Powerplants
10 May	Principles of Aircraft Systems Preflight Actions
17 May	Safe & Efficient Operation of Aircraft (Part 1)
24 May	Safe & Efficient Operation of Aircraft (Part 2) Diamond DA20 Eclipse, DA40 Diamond Star MMU Airport Services & Procedures Course Review

Flying your own aircraft remains the single most effective way to do business in multiple locations. With the reduction in regional airline service, it simply isn't possible to do business in Syracuse and Rochester and be back in Manhattan the same day. When you fly, you do business on your own schedule, not someone else's.

Learning to fly typically takes several months. You can take a year or two but it won't be cheap. You can learn to fly in two weeks, but that will be a full-time adventure you will remember for the rest of your life.

Learning to fly is a great adult challenge – not impossible, but requiring some dedication. Piloting an aircraft for pleasure is a fulfilling experience. And by flying yourself, your vacation home becomes that much more useful.

Best in Flight is conveniently located at Morristown Airport, 20 minutes west of the Holland Tunnel. We are five minutes from Convent Station, a direct train from New York's Penn Station. We will pick you up at the station.

Best in Flight offers hours to suit your needs including early morning and evening flights.

Call the Chief Pilot, Robert Hadow, to discuss your requirements. (888) FLY-0077

Why the Best Instruction?

Flying is not a just hobby. It is also serious business.

Flying may be as easy as driving a car, but you don't drive a car two miles up. You don't have to talk to air traffic controllers when you drive. You need to understand what makes the airplane fly, the weather, and air regulations – the aeronautical decision making tools to exercise judgement in the air.

Best in Flight instructors each have a minimum of 2000 hours accident-free pilot-in-command time.
